# JULIEN GILBERT

## FRONT END DEVELOPER - IT SPECIALIST

Recently graduated JavaScript/React web application developer, I leverage a decade of experience in IT systems and networks to bring a unique perspective to my projects. My atypical background, enriched by years of living in Southeast Asia, has forged my adaptability and open-mindedness. An effective communicator and natural collaborator, I know how to quickly integrate into new teams while remaining autonomous in my tasks. My rigor and sense of responsibility, honed through varied professional experiences, allow me to successfully carry out complex projects. Versatile and curious, I am constantly seeking new challenges to leverage my dual expertise in IT infrastructure and modern web development.

## SKILLS

- Expert web integrator
- React web application developer
- Problem-solving and needs analysis oriented
- Over 30 certifications in front-end development
- Constantly engaged in skill development and side project exploration

## PROFESSIONAL EXPERIENCES AND PROJECTS

- 2024 **Redesign and migration of a jQuery application to React**  
Skills in technology migration, performance analysis, and detailed technical documentation. Ability to reduce technical debt and modernize existing web applications.
- 2024 **Front-end development of a banking application with API integration**  
Skills in creating responsive user interfaces, managing global state with Redux, and documenting APIs with Swagger. Ability to develop complex web applications and manage fluid communication between client and server.
- 2024 **Development of an analytics dashboard with React**  
Skills in creating interactive data visualizations, managing HTTP calls, and comprehensive code documentation. Ability to develop advanced user interfaces and integrate complex data via APIs.
- 2024 **Web application development with React and React Router**  
Skills in creating React components, managing routing with React Router, and using SASS to enhance visual experience. Ability to create dynamic, responsive, and visually appealing web applications.
- 2023 **Requirements definition for a tutoring app**  
Skills in identifying client needs, modeling technical solutions, UX/UI Design, and project management using agile methodology. Ability to visualize design concepts, structure development, and communicate effectively with clients and the development team.
- 2023 **Debugging and writing unit and integration tests for an HR SaaS**  
Skills in debugging web applications with Chrome Debugger, writing unit and integration tests, and developing end-to-end test plans. Ability to ensure code quality and reliability, as well as quickly resolve issues.
- 2023 **Development of a search algorithm in JavaScript**  
Skills in developing search algorithms, performance optimization, and applying Green Code principles. Ability to analyze IT problems, compare performances, and create innovative and responsible IT solutions.
- 2023 **Integration of a mockup into a website with HTML & CSS**  
Skills in HTML structuring, CSS styling, and responsive design.
- 2016 **Network and Systems Administrator - Retail IT Manager Europe - Paule Ka Company**
- 2012 Technical consultant on IT projects - Complete overhaul of the architecture and IT system - Administration, management, operation of Active Directory and Microsoft roles (WSUS, MDT, DHCP, DNS, SPOOLER, NFS) - Network management with server maintenance - Implementation of a NAGIOS solution (CENTREON overlay) for infrastructure monitoring - Planning, coordination, and facilitation of internal resources and external actors.

## EDUCATION

- 2024 **Bachelor's degree in Software Development and Design**  
Level VI Title (RNCP 38038)
- 2004 **Computer System and Network Maintenance Technician**  
Level V Title (RNCP 35207)
